Date Cape

DATE NIGHT PLANNING SOLUTION

Elevator Pitch

# Concepts

## Description:

DateCape is a date night planning service app that aims to simplify and remove the stress of date night planning.

## Motivation:

The motivation behind this project was to create an application that could provide an easy-to-use, interactive, and responsive interface that gives users ideas for special outings and date night planning.

# Concepts

User Story:

AS A single person,  
I WANT to have a tool to find date night activities,  
SO THAT it simplifies and removes the stress of planning.

# Process

## Technology/Framework:

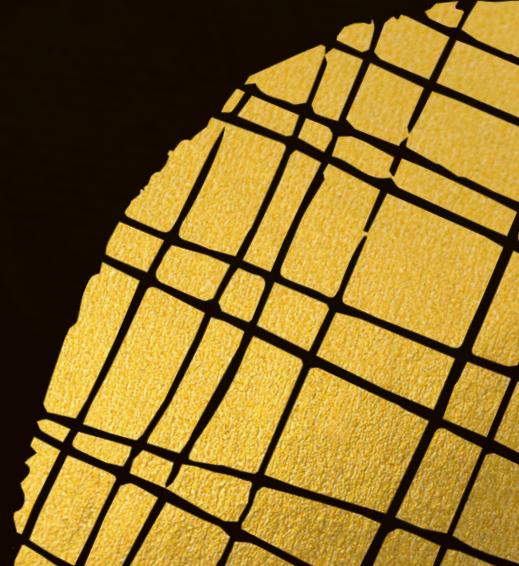

- \* Built with Visual Code Studio
- \* Bulma CSS Framework
- \* Flatpickr as Date/Time Picker

## Front-End Development:

- \* James Masaviru
- \* Imari Pickens

## Back-End Development:

- \* Paris Barnett
- \* Branden Burnett
- \* Tynesia Davis

# Process

## Successes:

- \* Having a great mobile responsive UI display for the user
- \* Finding a calendar solution using Bulma
- \* Condensing multiple HTML using pages into a single
- \* A successful API call

## Challenges:

- \* APIs that needed to use authentication had to be eliminated from the project
- \* ATOM

Demo

# *Directions for Future Development*

- \* Vacation Planning
- \* Transportation option at your vacation destination
- \* Future versions would include cost options
